

365

Amaranthe

365 in a day, that's how you know
The mission is before us, the courage is inside us
A mathematic function, I need, I'm monotonic
Conquering the high line, hiding from the daylight
Sequences of feeling like in my correlation
Searching for the borders, a fissure in disorder
Coming like a roach in a massive population
A rupture in the skyline, you leave it from the baseline
Please decide to come with me, come with me
Come with me, come with me
365 in a day, that's how you know
It is hard to say no
Before you learn to let go
365 in a day, that's how you know
It is hard to say no
Before you learn to let go
Come with me, come with me
365 in a day to save my soul
Just keep on letting things go
We keep on telling them no
The mission to divide us will only unify us
The systematic functions erasing our core
Bound to set the outline [?]
Think was [?]Time to say goodnight, so I've been left to side for
Parasitic system to face the embryonic
Well beneath the high rise, coming for the sideline
And now you come with me, come with me
(Come with me, come with me)
(Follow me, follow me)
(Come with me, come with me)
And bow down before us!
365 in a day, that's how you know
It is hard to say no
Before you learn to let go
Come with me, come with me
365 in a day to save my soul
Just keep on letting things go
We keep on telling them no
3, 6, 5
365 in a day, that's how you know
It is hard to say no
Before you learn to let go
365 in a day, that's how you know
It is hard to say no
Before you learn to let go
Come with me, come with me
365 in a day to save my soul
Just keep on letting things go
We keep on telling them no
