

Problem Child

Little Big Town

You ever wake up outta one of those dreams
Where you open your mouth but they can't hear you scream?
You carry around an invisible heart
Misunderstood, they don't know who you are

Are you the black sheep?
Have you been lonely
Out on the outside?
You're not the only one

What's your problem, child?
What's your problem, child?

Send up a signal, you send up a prayer
Does anyone notice? Does anyone care?
Wildflower growing through the cracks in the street
A beauty unfolding that nobody sees

Are you the black sheep?
Have you been lonely
Out on the outside?
You're not the only one

What's your problem, child?
What's your problem, child?

Did someone not love you?
Were you not enough?
Did you not belong in their eyes?
Why don't you fit in? Why don't you add up?
I've been asked time after time

What's your problem, child?
What's your problem, child?

Are you the black sheep?
Have you been lonely
Out on the outside?
You're not the only one
