

Here With Me

Everyday Sunday

You said that You hold the earth and moon
And I know that the morning bows to You
So when the water rushes over me
You'll be there to pull me from the deep
I believe that You are
Everything You say You are
I will follow You forever
Even if I'm standing in the fire
I believe, I believe and I have seen
I believe, I believe You're here with me
You said that Your light would chase the dark
Your love for me was written in the scars
So if I'm feeling paralyzed with fear
I know that You'll never leave me stranded here
I wanna be where You are
You carried me this far
