

# Down

311

Chill, light on my sight as my ego becomes  
A funky child with some words on my tongue  
Be like intake of breath and my mouth gets loose  
So while I scatter my spit, I dream of juice  
Have you ever made out in dark hallways  
Displayed a kiss that made your day or say  
Played a track from your record collection  
It's your mix, congratulations We've changed a lot and then some, some  
You know that we have always been down, down  
If I ever didn't thank you, you  
Then just let me do it now I bet you light up when we start the show  
Follow me now very closely 'cuz I told you so  
You know, we glow because we throw sun rays  
Yeah we be freaky and we wanna stay  
We've changed a lot and then some, some  
You know that we have always been down, down  
If I ever didn't thank you, you  
Then just let me do it now Lightning strikes, yo we be in that violent force of light  
Guaranteed to turn it out as bad as dolemite  
Because we're dope kid, change like a chameleon  
And the channel whenever the wack show Real World is on  
You know we dazzle like ghetto box boomin' battles  
Rattle inside your head feel redeemed like cola bottles  
Fall in love with your teachers, on the wax we are self made  
Check the technique, 311 in L.A. We've changed a lot and then some, some  
You know that we've always been down, down  
If I ever didn't thank you, you  
Then just let me do it now  
Keep my feet on the ground  
Keep my head in the clouds  
Electrified by the sound  
Comes from the down, and  
We've changed a lot and then some, some  
You know that we've always been down, down  
If I ever didn't thank you, you  
Then just let me do it now
