

# Undercat (feat. Zealot)

## Tristam

[Verse: Zealot]

Fight the fleet, the battles where I feel at home  
We'll leave you violated, leavin' two in your dome  
You should've known, you come with us, we'll take your throne  
Install and puppet government and call it our own  
The comet's only lying on the first to fight  
The last to die, in every rule of riddled night  
What a sight, to battle in the pale moonlight  
And match the fright to fighting that's what is right
