

# Walk Tall

## Kele

I don't know what you've been told  
I don't know what you've been told  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall I don't know what you've been told  
I don't know what you've been told  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall I don't know what you've been told  
I don't know what you've been told  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall I don't know what you've been told  
I don't know what you've been told  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall  
Rule number one, be bright like the sun  
Whether rude whether flawed like it's just begun  
Rule number one, be the only thing they see Rule number two, do all you can do  
Look them all in the eye and leave them to fly  
Rule number two, be as bright as you can be I'm getting taller  
I'm getting taller Rule number three, forget where you've been  
Cut your ties to the past and wave it goodbye  
Rule number three, take anything you need I got discipline appearing in marshals never caught  
before  
Just like a terminator walking like a skilled boy  
No, I couldn't stay, I've really got to go I'm getting taller  
I'm getting taller  
I'm getting taller  
I'm getting taller  
I'm getting taller  
I'm getting taller  
I'm getting taller  
I'm getting taller  
I don't know what you've been told  
I don't know what you've been told  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall I don't know what you've been told  
I don't know what you've been told  
But this starts now, walk tall, walk tall  
But this starts now, walk tall, walk tall
