

# Still Awake

## Sadistik

[Verse 1]

I packed the bags below my eyelids  
Soaked in ultraviolets, smoking Ultra-Violence  
No compliance, oh I'm so defiant  
(Vampires knock-knock, but I never let them in)  
I packed the bags for frozen climates  
Full of token triumphs, I show to those who spite it  
Spineless, with their multiple disguises  
(Vampires talk-talk, but I never question them)  
They look so ugly on the inside  
Giving me their lip while I'm swimming in the riptide  
Ad-vice in my ear and out the other  
Hearing what they mutter, peering from the shutters  
Werewolves underneath, skin I wear, upper-teeth  
Bicuspid coming like stalagmites, so fuck with me  
In the company of wolves, you don't trust the ones you know  
So I'm low, a hundred feet below

[Hook]

Oh, I'm underneath the full moon, howling like the wolves do  
With no dreams to chase (I'm still awake)  
I'm underneath the full moon, howling like the wolves do  
With no dreams to chase (I'm still awake)  
Still awake, still awake, heavy-headed pillowcase  
Mind racing figure-eights, I'm still awake, still awake  
Still awake, up all night to kill the brain  
Twenty shots kills the pain, I'm still awake

[Verse 2]

So I follow tracks to kill my prey  
I call them that, I do it for the thrill, the chase  
I'll make 'em feel my blade, I'll make 'em pay  
For what they did to me, I'll never sleep (I'm still awake)  
Beneath the window pane, staring at blackness wide-eyed  
Oedipus Complex with the matricide  
How many days did I waste on the mattress side?  
I can't decide  
The sun don't shine when I'm up all night  
Somehow I've become so light  
That I float, oh so slow, over oceans, troubled tides  
Couple highs, seasoned lows, subtleties I love to find  
Even though I've become so blind, feel so low but I'm up so high

Yeah, than I've ever been, it's heaven-sent  
Evanescing when I'm second-guessing my own rhetoric  
Perfectionist with the sedative  
Called melatonin and acetaminophen, that's for my head again

[Hook]

[Outro]

I never sleep cause sleep is the cousin of death  
Dang, I'm still awake
