

Distraction

M1LDL1FE

If your skin is made of light
Get me drunk on cosmic wine
If your eyes are the ocean mists
Then pull me into the abyss
We're made from the same dust
Like stars from the same dusk
"Don't dive in, it's dangerous"
Hold on, here we go
All my life
Been tryna find your lips, my kiss
They're made for each other
Hands into the night, it will be alright
Take away my heart to see an ocean deep inside of me
Tear apart my head and feel infinity consuming me
All my life, ooo
Under covers intertwined like this
Drowning in a golden abyss
Find infinity in your eyes
See myself floating out of sight
Like sand from the same tide
And lights on the shore line
"Up there, it's just too bright"
Just pull me under
All my life
Been tryna find your lips, my kiss
They're made for each other
Hands into the night, it will be alright
Take away my heart to see an ocean deep inside of me
Terrified by any feeling, infinity consuming me
All my life, ooo
All my life
Been tryna find your lips, my kiss
They're made for each other
Hands into the night, it will be alright
Take away my heart to see an ocean deep inside of me
Terrified by any feeling, infinity consuming me
All my life, ooo
