

# Forever Young (feat. Diplo)

## Lil Yachty

All night I've been watching you  
So tonight, you're leaving with me  
I've been waiting my whole life to give you it all  
It's on now, it's on now  
I'm talking the big fancy lights  
The star studded nights with me  
We forever young  
We forever young  
We forever young The music's loud and I'm feeling wild  
Come dance along with the golden child  
I don't know much but sure, let me check your fouls  
Two technicals but you beautiful  
You grew up 6 brothers in a cubicle  
And they all bustin' for ya if I make the wrong move  
If I break your heart then I'm a dumb dude  
You get what you give and I'm the one who loses  
But we could be together forever  
But we could be together forever and ever  
I wanna live life with you forever and ever  
Together  
Forever young  
Forever young  
We forever young Shining bright under the shining sun  
Like moonshine you keep it 99% with me  
I'm feeling all your energy  
I know you love to vibe with me  
I know you love to ride for me  
Your favorite thing to say is, "Boat, I love when you're inside of me"  
Your love is like a high to me  
I love to go out my way to make sure you stay happy  
We forever young  
The music's loud and I'm feeling wild  
Come dance along with the golden child  
I don't know much but sure, let me check your fouls  
Two technicals but you beautiful  
You grew up 6 brothers in a cubicle  
And they all bustin' for ya if I make the wrong move  
If I break your heart then I'm a dumb dude  
You get what you give and I'm the one who loses But we could be together forever  
But we could be together forever and ever  
I wanna live life with you forever and ever  
Together

Forever young  
Forever young Forever young, forever young  
Forever young, forever young  
We forever young
