

# Lovesick

Trevor Daniel

I'll love you through the highs and through the lows  
So you can call me whenever, about whatever  
I'm here for you for the rest of forever A lifetime with you doesn't seem that long  
I'm lovesick, got an illness  
If we don't make it work, positive it's gonna kill me Okay, okay, okay, it's gon' be alright  
No plan to vice, can divide you and I  
New coupe, it fits two inside  
Let's go, we can drive  
Down to the water, you pullin' me in like riptide  
The world stops  
Baby, I'll be right there by your side  
I-I found something I didn't believe 'till now  
I drink the potion she makes, this girl is magic (Magic)  
First time for everything, but this shit is drastic (Drastic)  
She got me diggin', got me building a casket (Casket)  
I hope there's somethin' interesting on the classic  
I'll love you through the highs and through the lows So you can call me whenever, about  
whatever  
I'm here for you for the rest of forever  
A lifetime with you doesn't seem that long  
I'm lovesick, got an illness  
If we don't make it work, positive it's gonna kill me I drink the potion she makes, this girl is  
magic  
First time for everything, but this shit is drastic  
She got me diggin', got me building a casket  
I hope there's somethin' interesting on the classic  
I drink the potion she makes, this girl is magic (Magic)  
First time for everything, but this shit is drastic (Drastic)  
She got me diggin', got me building a casket (Casket)  
I hope there's somethin' interesting on the classic  
I'll love you through the highs and through the lows  
So you can call me whenever, about whatever  
I'm here for you for the rest of forever  
A lifetime with you doesn't seem that long  
I'm lovesick, got an illness  
If we don't make it work, positive it's gonna kill me  
(Oh, no, no, no)
